

Shiba Rewards

WHITEPAPER

Ticker : **\$SHREW**

Website : **SHIBAREWARDS.IO**

Disclaimer:

Nothing in this whitepaper constitutes financial advice or a contract. Investing in any cryptocurrency project is a risk. Before making any purchases of SHIBA REWARDS, we recommend you conduct your own research using this whitepaper, our official website, and our official social media channels. Nothing in this whitepaper, on the official web site, or official social media channels is a guarantee or promise of future performance of SHIBA REWARDS. Losses can be substantial based on the level of your purchase. While we have established parameters to restrict certain transactions, there can be great risk in the crypto market. You should only participant in any cryptocurrency project if you are prepared to sustain a total loss of the money you have invested in that project.

The Problem

Our team has long since realized that most new token projects are designed to get one group of people rich, the developers. Since we were disappointed over and over again in the number of projects that don't actually focus on the investors, we developed our own project.

The Solution

A token that puts investors in the drivers seat, with low overall taxes and **low marketing/dev fees**. Introducing **Shiba Rewards!**

How it works

Every buy and transfer of Shiba Rewards features **0%** taxes.

Every sell of Shiba Rewards has a **10%** tax distributed as **3%** Shiba Inu tokens, **2%** Liquidity, **4%** Marketing/Dev, and **1%** Burn.

To receive Shiba Inu tokens, all you have do is **HODL** at least **10,000,000** Shiba Rewards tokens and you'll receive a percentage of the distribution of each sell.

Why Shiba Inu tokens?

The Shiba Inu ecosystem consists of three tokens: Shiba Inu (SHIB), Leash (LEASH), and Bone (BONE) with the SHIB token is the most prominent component of the Shiba Inu ecosystem.

CoinMarketCap lists Shiba Inu (SHIB) as the **#15** cryptocurrency in the world. What started as a meme token is now a successful community token with its own exchange and has a market cap of over **\$13 billion**. At any moment, someone like Elon Musk can fire off a Tweet and Shiba Inu HODLers could experience amazing profits!

Tokenomics

Total supply: 1,000,000,000,000 (1 trillion)

Contract: 0x895D473aBFFaa469279f6b7055375349f9A53Bc6

Soft Cap: 125 BNB

Hard Cap: 250 BNB

Presale: 51%

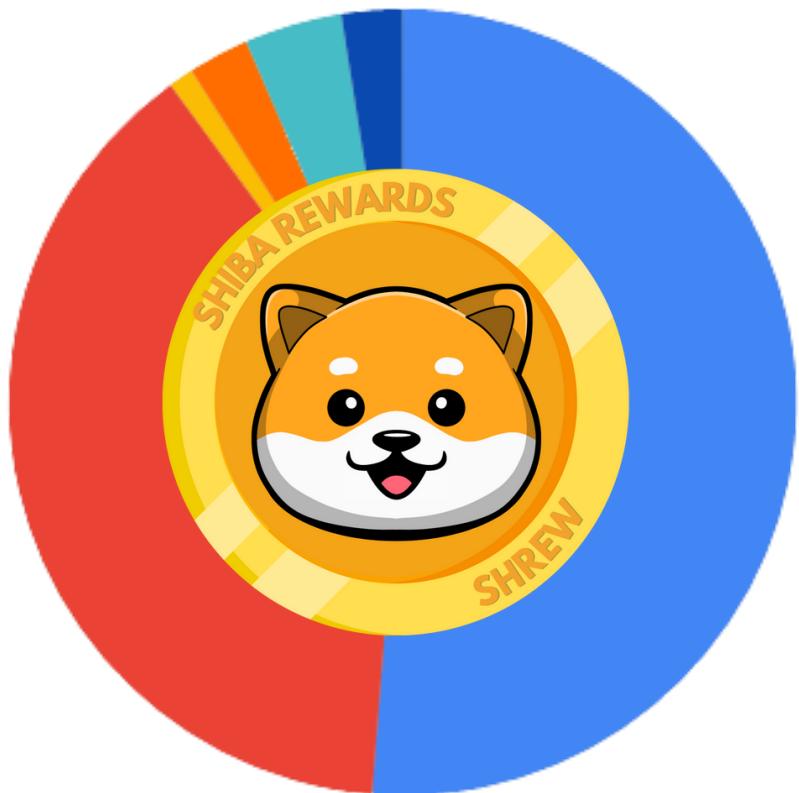

Liquidity: 39%

Team: 4%

Marketing: 2.5%

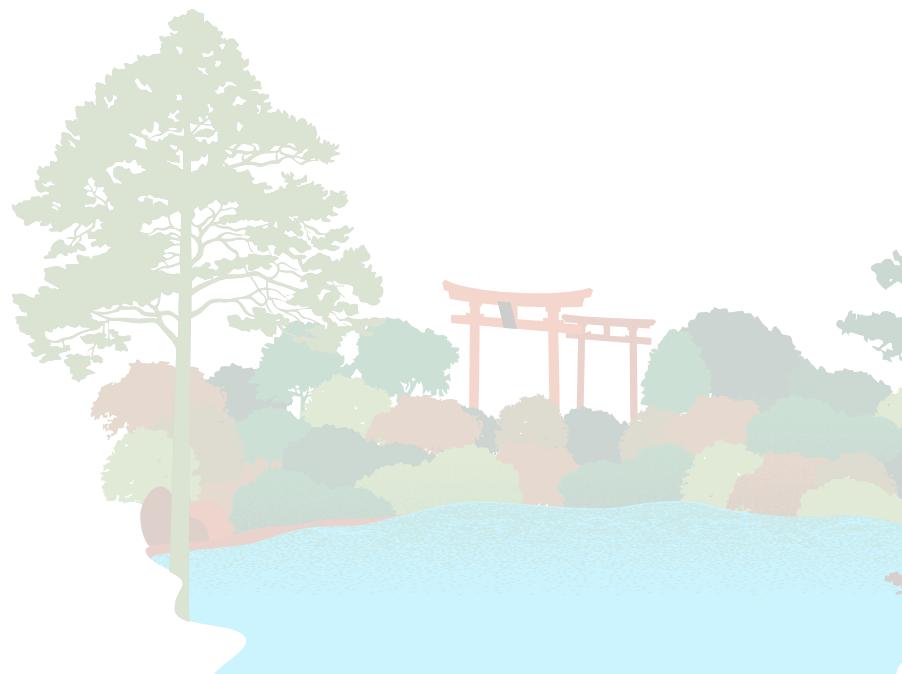

Giveaways: 2.5%

Launch Fee: 1%

Presale 1 BNB = **2,050,000,000 \$SHREW**

Listing 1 BNB = **1,975,000,000 \$SHREW**

Why Shiba Rewards?

Community support and trust in this project is extremely important to us. As such, we have implemented features in our token's contract that demonstrate our commitment to protect investors.

- 👉 **Anti-whale feature** - Individual transactions are limited to a max 1% of total tokens in circulation.
- 👉 **Can not lower max transaction limit** - We are unable to lower the max transaction below 1%. This prevents us from putting it at 0% and thereby not allowing any sells to occur. Many contracts do not have this feature.
- 👉 **Can not mint or burn tokens**
- 👉 **Can not pause contract** - Also can not put a timer lock on the contract.
- 👉 **Sell taxes can not be raised above a total of 10%** - While we can change the various tax amounts until we renounce ownership, we can not raise the total sell taxes above 10%. Meaning all sell taxes must add up to 10% or less.
- 👉 **Liquidity is locked for 5 years** - Immediately after the pre-sale, **80%** of the raised liquidity was locked for **5 years** at PinkSale. A link is provided on our website for verification.
- 👉 **Full contract audit** - A full contract audit was completed by Audit Rate Tech and is published. Shiba Rewards passed with no critical, high, medium, or low issues discovered.
- 👉 **Team is KYC'ed** - Conducted by IDOPresales & PinkSale. Founder is doxxed.
- 👉 **Team tokens are vested and locked for one year**
- 👉 **Renouncing ownership 1 year after launch** - We will renounce ownership at the 1 year mark after team tokens unlock (to ensure no issues)

Roadmap

Phase 1

- Whitepaper launch
- Deploy contract
- Website development
- Community building on Telegram, Discord, and Twitter
- Conduct contract and KYC audits
- Begin marketing push

Phase 2

- List pre-sale on PinkSale
- Develop Dapp for website
- 2,500 Telegram & Discord members
- 1,000 Twitter followers

Phase 3

- Launch on Pancake Swap (conclusion of pre-sale)
- Lock liquidity for 5 years
- Update listing on BSCScan
- Lock Team tokens for 1 year
- 1,000 \$SHREW HODLers
- 5,000 Telegram and Discord members
- 2,500 Twitter followers
- Expanding marketing campaign following successful launch

Phase 4

- List on CoinMarketCap and CoinGekco
- Continue marketing campaigns
- Begin 12-month airdrop campaign for token holders
- 5,000 \$SHREW HODLers
- Develop merchandise
- 10,000 Telegram & Discord members
- 5,000 Twitter followers
- Renounce Ownership 1 year after launch

Final Thoughts

We were tired of terrible projects we invested in and never saw real rewards or were so scammy with high taxes for the Devs, you knew the projects were going to get rugged. Or they take 30 to 49% of liquidity raised, basically skimming profits from the start thereby condemning new projects to fail. Frustrated, we created our own token and have heavily focused on protecting the integrity of the project. This is the first of two major projects that will interconnect and reward token holders. Big things are coming later this year and we're happy to have you as a member in **OUR** community!

Thank you!
